**What's New In Fluent?**

Fluent is an all-in-one browser extension for Chrome and Firefox. Its claim to fame is its usage of intelligent cloud translation that is almost instantaneous and happens on-the-fly. The big problem of using Fluent is that, by design,

you will most likely have to give it additional permissions to translate the words on the web page you're currently on. And we're not talking about things like "I want to translate the page" -- just "Translate all of the words." In fact, there's no option to configure it, you just have to accept it or not. Furthermore, the extension does not have the best user interface, and is pretty slow at tracking your progress. Moreover, translation accuracy

is not always very good, and not all the languages are translated. All-in-all, Fluent is a good way of learning a new language, but it lacks a few features that will make it extremely good. Fluent Pricing: Free Lifetime License Support (Free) Pricing: There is no specified pricing, but is free for the lifetime of the product. For some people, this could be a great product. The only drawback is that they have to give the extension more

permissions to translate text on the web page. And unless you need to learn French, this could be a problem. Icons: Fluent does not use its own icons. It uses the latest icons from Google Fonts. Must-Have Features: Translate all of the words on the page Fluent is the only extension to provide real-time translation Must-Not-Have Features: Some other nice features are missing: some dedicated storage where you can store the translations of

the words you've clicked on, conversation mode, speaker mode, and so on. Fluent Alternatives: Currently, Fluent does not have a competitor. There are, however, a number of other products that can be used to help you learn languages, such as Rosetta Stone, Lingua Mobile, and Fluentapp. Fluent Pros: + Quick and easy to download + Works for all languages + Comes with a free lifetime license + Free Lifetime

Updates + Support and help included Fluent Cons: - The interface is not very user-friendly - The interface is not very comprehensive - Only offers one language It should be noted that Fluent is one of the quickest and easiest ways of learning a new language
