Installation Details: Installation instructions: Copy the file UniversalViewerINIRelocation.pkg to the /Applications directory. Unzip it to

What's New in the Universal Viewer INI Relocation?

This INI-format relocation application allows to control the settings of various parameters of the Universal Viewer. Depending on how it is started, the application can adjust the internal configuration and/or provide an output file that you can use for a manual setup of the UD Viewer or to apply the changes automatically to the UD Viewer. The output INI files contain the new config file and the new user settings. Usage: Install and run this application and it will do the following: 1. Find and read the old file for the view distance settings: (QW: The file named "atviewer.ini" is located in the root folder of the application. The default is "C:\WINDOWS\TEMP") 2. Check if you have a new file for the view distance settings: (QW: The file named "atviewer.ini" is located in the root folder of the application. The default is "C:\WINDOWS\TEMP") 3. If so, backup the file: (QW: The file named "atviewer.ini" is located in the root folder of the application. The default is "C:\WINDOWS\TEMP") 4. Load the new file to replace the old file: (QW: The file named "atviewer.ini" is located in the root folder of the application. The default is "C:\WINDOWS\TEMP") 5. Delete the old file: (QW: The file named "atviewer.ini" is located in the root folder of the application. The default is "C:\WINDOWS\TEMP") 6. Save the new file and close the application: (QW: The file named "atviewer.ini" is located in the root folder of the application. The default is "C:\WINDOWS\TEMP") 7. Restart the UD Viewer: (QW: The application is installed in the "Program Files" folder. It is named "ATViewer.exe" and will be located under the "Universal Viewer" sub-folder of the "Program Files" folder. The default is "C:\Program Files\Universal Viewer\ATViewer.exe") 8. If all went well, then you can use the "Open new UD Viewer Config File" option to open the output file created by this application: (QW: The application is installed in the "Program Files" folder. It is named "ATViewer.exe" and will be located under the "Universal Viewer" sub-folder of the "Program Files" folder. The default is "C:\Program Files\Universal Viewer\ATViewer.exe") License: This freeware is licensed under the GNU LGPL
