6-th order Butterworth high-pass 6-th order Butterworth high-pass Audio filters are perfect for all types of music. They remove audio frequencies with frequencies higher than 500 Hz and they can be used as a mastering filter. These audio filters can be found in audio recording studios and they are often used as a first mastering tool. In mastering they are used in an opposite way to all the other audio filters as they reduce low frequencies as well. Standard implementations Modern software audio apps, especially when it comes to mastering, use audio filters with the 6-th order Butterworth-type implementation to implement band-pass, high-pass and low-pass filters. They use very effective audio filters with many internal settings to achieve the best possible result. If you are looking for 6-th order Butterworth audio filters to use in your audio editing app, you will be pleased to see that there are a number of great options to choose from. The 6-th order Butterworth audio filters for mastering and audio production have a wide range of settings and a complex algorithm. You can choose the order and the number of poles to create a suitable 6-th order Butterworth filter for your needs.

A little bit of history When we launched our product 4 years ago, we said: "the top 20% of people would create a visible market for us". 4 years later, we say: "the top 80% of people are our customers". We were very happy with our progress. Yet, we still met many people who, after their first or second game, did not move on because it did not appeal to them. How can a game be appealing? If you want to reach this top 80% of people, you have to consider your own point of view, i.e. find out what can be interesting for you. If you are not willing to play such games, you will not be interested by the success of your colleagues or friends. Here, we show you the main reasons why people do not buy games in our shop, and we share the solutions for you to change this.

Problem 1: The concept is not understood The first problem that most people have is not understanding the concept of the game. To solve this, we created a "concept video" for each game. A concept video is a short video showing how the game is played. It can be watched and shared with
