Becoming is a romantic drama told using sound novel game mechanics and featuring 3D rendered images. Your decisions and actions will shape the story's events while the choices you make will affect your character's state of mind. Your main character works in a prestigious company during the night shift, toiling away as usual when he is transferred to the afternoon duty. While working during his day shift, he meets a high school teacher that he had a relationship with some five years before. The reunion will determine the course of his life. The game will play as a simple story line told by characters speaking sound novel style. The main character's state of mind will change through dialogues and events. It can be likened to an interactive storybook, where the events unfold in front of you and the choices and decisions that you make will affect the outcome of the story. The game is divided into chapters, each containing a set of events (dialogues and events). The player's actions will determine the outcome of the main character's state of mind, which determines his or her interactions in the story. The game contains 3D rendered images that change their appearance depending on the main character's emotional state. Despite being a story, it's as intense as an interactive horror story or psychological thriller. This is your guide through the gripping story of your main character's decisions. Key Features: • Story told in sound novel style. • 3D rendered images that change based on the main character's emotional state. • Multiple endings. • After the story has been played through, the player will have the opportunity to continue their main character's journey and complete the whole story again.Q: How to find the radius of convergence of $\sum_{n=1}^{\infty} (-1)^n a_n x^n$ where $a_n = \frac{(-1)^n}{\sqrt{n}}$? How to find the radius of convergence of $\sum_{n=1}^{\infty} (-1)^n \frac{a_n}{\sqrt{n}} x^n$ where $a_n = \frac{(-1)^n}{\sqrt{n}}$? Why do I have to multiply the \sqrt{n} by x in the denominator when it is $a_n x^n$ in the numerator? A: c9d1549cdd

VirtuaCreature is an 8-bit '80s-styled videogame where you take control of a unique monster that has learned to adapt to you. You will care for it, raise it and evolve it in a 'lifetime' of 30 unique stages. Throughout the game, you will make choices that decide its destiny. These choices range from feeding habits to way of life, and will impact its evolution, and level of happiness! It's very important that you pay attention to every single aspect! As a matter of fact, the more that you pay attention to every single detail, the more likely you are to survive through all 30 stages and be victorious against the creatures of the Void Mine! The world where your monster lives is full of dangers and traps that must be avoided - unless you want to be eaten alive! There are two goals for the player to achieve in the game: - Raise your creature to the highest level possible, and - Make it happy! It sounds simple, but it is not. Mistakes are made along the way and the most common mistake is to neglect your monster and let it starve. This means that time is running down, the creature is angry and it will be much harder to feed it. Are you ready for the challenges that lie ahead of you? Features: - Over 20 unique monster designs to discover! - A multitude of different activities to do! - Make life-long memories as you interact with your creature! - Explore the world, and meet the inhabitants to befriend them! - A monster that needs nurturing! - A life-like Creature! - Pronouncing commands with on-screen characters! - Customize your creature, and make it your own! - Buy and combine different stats and equipment to make your creature even stronger! - Varieties of other player-controlled Monsters! - Artwork of a high quality! - Effort will be rewarded! - 8 bit art style! - An epic soundtrack of every single one of the stages! - A world that will keep you dreaming for a long time after you beat the game! - Simple controls with no game-pad required! - An easy to learn but hard to master game! - Different game modes for every type of player! - The player can fully customize their monster to their liking! TODO: - More Music! - More Creatures! - Synth composer!

What's new in MegaRace 2:

1: CREATE an Ecosystem of OSMs friendly to your business Want to create an Ecosystem of OSMs (OpenStreetMap) usergroups? This free chat about map creation, editing, and mapping with users interested in various projects is being implemented as an online entity that you participate in during a simple four-step cycle. All of this is possible with the use of the one operating system, DREAMcowork Matrix, as the basis. It will be called CREATE for short. DREAMcowork Matrix is a communication platform that connects people, ideas and projects that aim to advance cooperative and inclusive technology solutions through the collective creation and management of commons-based public goods. In a nutshell, HERE supplies the hardware and DREAMcowork Matrix the software. Working with an organized collection of data and mapped reference points is a community survey and mapping exercise that will be launched early next year — 2019. The knowledge and experiences will be donated to project foster / apply or will be used to augment future versions of the platform. The two main contributions from DREAMcowork Matrix are documented in its Community Guidelines and Rules. Additionally, the Community Guidelines and Rules are discussed regularly in the Community Discourse. DreamCowork Beta 1: CREATE Many OSMers are already innovating in ways that are compatible with here's aspects. By doing this work with a common technology, as a collective, and using multiple map sources, we can more easily bring together the map diversity and locate specific points of significance — knowledge that is necessary to join our ecosystem. Then comes OSM Platforms, which are individualized online entities where users can coordinate on topics, questions or their own needs and limitations. While OSM Platforms run on map tiles (perhaps indirectly), they are configured to suit individual needs. OSM Platforms are free to use, are well-funded, and are free to run. Their chief contribution to the OSM Ecosystem is business opportunity. At the same time, OSM Users can form Groups, OSM Users can encourage the creation of online projects, OSM Users can solicit support for a map-based business (or service), and OSM Users can promote, validate, correct and to a limited extent encode new map data via editing and organization. Perhaps, the most reasonable and optimal way to connect them is to make so many OSM Users have a place to flex their opinions and explain their needs, and to do this

Hunter Project: Survive! is a top-down action shooter set in an abandoned military research facility on Earth in year 3035. The facility was once a facility devoted to research on the parasite infection that ravaged the planet. After failing to figure out how to reverse the infection, the facility was abandoned. The military found out that the infection is spread by eating, and decided to create a branch of the military, the Cleaners, to go out and clean the infected areas of Earth, kill all hosts, destroy all infected devices, and destroy all infected data. This branch of military was created by using a method only able to be used for covert missions. In their stealth missions, the Cleaners utilize the method, "The *Marker", to wipe out any infected hosts in their way. The *Marker is an antenna that can find and focus on infected hosts and sterilize any hosts in the vicinity of the receiver. Due to the infected's ability to collect energy from different sources, when a Cleaner uses their *Marker and wipes out a host, there are chances that the parasite might receive energy from the Cleaner's *Marker and grow faster. If this situation is not checked, a Cleaner is wiped out by the parasite. This is how the Cleaners became orphans. Hunter Project Survive! is a top-down action shooter that puts you in the shoes of an agent tasked to go to Earth and make a dent in the infestation called the "Hive". Your team is dead and you are now alone, abandoned by command. Survive! if you can. This is not a survival run. It is an action shooter. The Hive spawns will come from different directions, and you can only fire once. You have a limited amount of Ammo, and you cannot drop your weapon to reload, so be careful not to waste your precious ammunition. The Hive will constantly attack you and you must keep an eye on your vitals. The environment will not come to you. You have to go to different locations and areas on Earth to survive. Survive! If you can survive long enough to get back to your base, you will be awarded with trophies and experience points to be used to rank up in the game. It is a top-down shooter, that allows you to use guns to hunt or fight infected hosts. How to install: 1. Extract the iso file to any drive of your choice. 2.
