For example: "I have a little cat who says'meow'." I would like to search for the first occurrence of 'cat' in the sentence (the first letter of the word occurs in the word 'cat'). Anyone have any ideas how to accomplish this in python. Thank you! A: You could use the re module to do this, where you provide a search pattern, but only search for the pattern (and nothing else) once. import re def get_match_index(s): """Given a string s, find the index of the first occurrence of a given string in the s. """ start = 0 for pos, c in enumerate(s): if c == 'cat': return pos else: start += 1 raise RuntimeError("No match found") txt = "I have a little cat who says'meow'." print get_match_index(txt) Q: How do
