Copy and paste are now nearly 800 percent faster, thanks to improvements in the internal engine that enable copy and paste from programs like Keynote and InDesign. A new "autosave" system brings designers closer to their work by letting users toggle between auto and manual save options depending on their needs. During this session, I will show you the latest version of Photoshop and talk about the new features. In the spirit of social media, Adobe made it easier to share files with new publishing and social features. The app's new streamlined user interface makes it easier for non-photographers to create graphs, export data and many other assets. A new HSV tool gives users more control over color-opacity settings. The Move tool is now more flexible, allowing users to preview the exact outline of objects they are moving. Elements now offers faster, shadowless exposure. The Newest version of Photoshop will integrate directly with popular design programs such as Adobe InDesign, Adobe Illustrator, and Adobe Keynote and a new workflow has been introduced where people can create edits to files in Photoshop, ask colleagues to review the changes, and then publish the changes. This will help overcoming the gap in the creativity process between Photoshop users and designers. It is one more step towards a more collaborative working environment. Another major change is the introduction of a new organization and workflow with the new Creative Cloud library. The new organizer is very similar to Flickr or Dropbox, where you can organize and share skins (the creations of individual users) as well as color palettes, brushes, and other assets. This could be useful feature for professionals who need to share their creations.
