Photoshop CC focuses on efficiency and simplicity, so media professionals spend less time designing and more time creating. It's time to focus on the creative side of the business instead of the complex details of design. We rethought everything from content creation workflows to tools like Actions and Photoshop Actions, action sets tailored to the way you make things happen in Photoshop. When you install Photoshop Package Manager, you can easily manage and deliver and deploy action sets as you publish them. For easier and more efficient experience, Photoshop CC layers can now be automatically organized and presented in tabs to enable more efficient browsing. When you organize layers, you can focus on creating content while Photoshop takes care of the details. Instead of constantly shifting your focus, you can work one object at a time and group elements together to make it even faster. Cloud Drive is fully integrated into Photoshop, so you can save any file you want directly in the Cloud and access it anywhere. Using Photoshop Plug-ins, you can automatically validate your fonts, create or change watermarks, and more. Photoshop Lens Corrections enhance your artwork by exposing the original image through a range of novel filters. Photoshop Masking continues to provide fluid editing workflows, with the ability to process layers to generate a selection mask for each layer. And Powerful Selection lets you control where Photoshop constrains your selection, including the ability to identify features, activate and deactivate them, and even remove them with a single brush.
